Laws

A comprehensive list of laws regarding traffic and other offenses.

Reports

Hassle-free reporting, map display of tickets and occurrences.

Powered by:  **Mobilestyx**
If you can imagine it, we can build it.

Problems with Existing Systems.

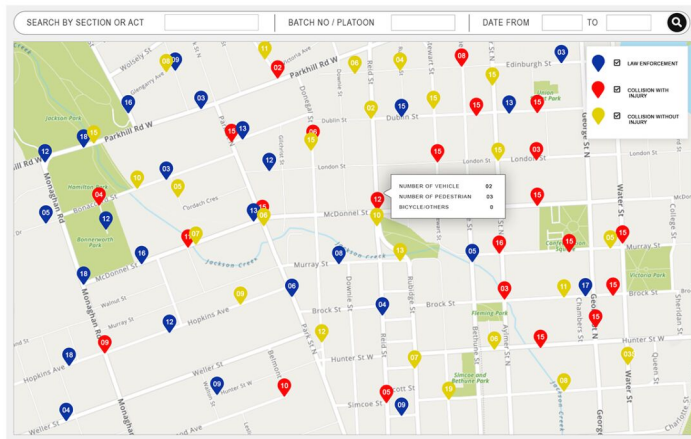

- ◆ Ticketing process is manual.
- ◆ Manual processes are time consuming and can also be unreliable. Wrong information written or illegible writing may cause the courts to throw out the charge.
- ◆ Maintaining documents is labour intensive. The data for specific reports is almost impossible to create.
- ◆ Time consuming. Officers spend more time on the side of the road increasing safety risks to officers and the public.

Solutions Provided By Us.

- ◆ Manual work / dependency to be removed.
- ◆ Automated documents have little to no errors. Increasing successful prosecutions.
- ◆ Automated reports with customized fields.
- ◆ Extremely fast ticket creation with voice to text notes allows officers to clear traffic stops quickly and efficiently.

GPS MAP REPORTING

Create accurate customized visual reports with our GPS mapping system. Include collisions, enforcement or other incidents to help better understand issues within your area. Increase the effectiveness of your deployed resources.

Tickets

Auto populates, voice dictated notes, data captured for reports, search function for charges.

Warning

Auto populates, voice dictated notes, data captured for reports.

Summons

Auto populates, auto fills court dates, data captured for future reports, search function for charges.
